

# Privacy in Flanders: attitudes hardly change

## Evolution (all respondents)

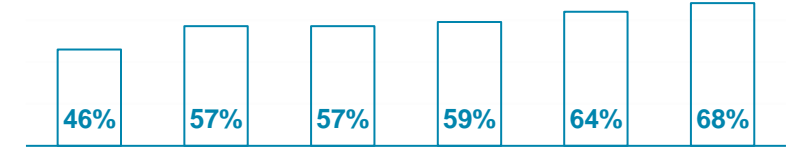

## Situation 2020 by age group

Agree or somewhat agree on statement:

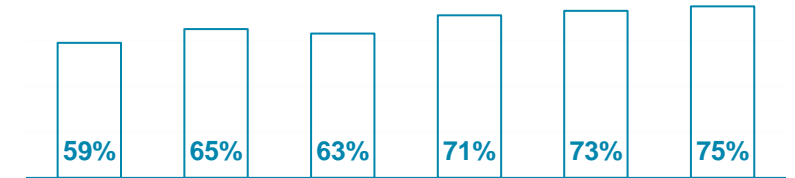

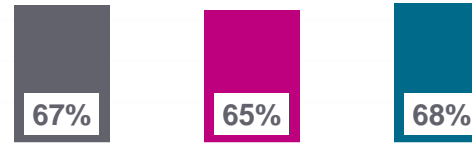

2017 2018 2019 2020

16-24 25-34 35-44 45-54 55-64 65+

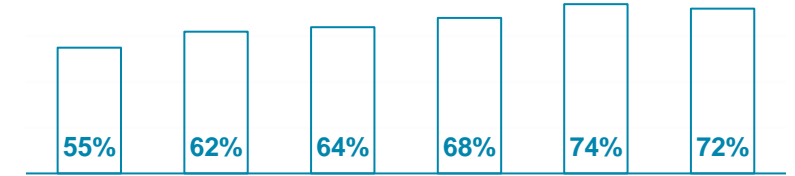

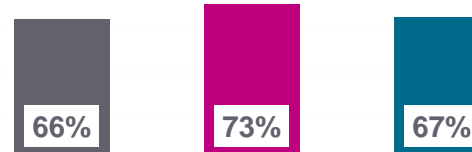

I am concerned by the impact of social media on my privacy

As a user I don't have control anymore on what personal information is collected and used about me

It disturbs me that companies are not transparent on what data they own and collect about me

I find OK to share personal data in exchange of something (eg bespoke information or service)

I think of it seriously when I give an application access to my location, microphone, contact list, camera...
